

LOCAL GOVERNMENT PROJECT DELIVERY SUPPORT

Project Leadership & Coordination for Capital Works, Infrastructure and Community Projects

Victorix is a Melbourne-based consultancy providing project leadership and coordination capacity for capital works, infrastructure and multidisciplinary delivery programmes - helping councils manage the consultants, contractors, stakeholders and regulatory interfaces that complex projects require.

We recognise that councils maintain highly capable in-house technical and statutory teams. Victorix is not positioned to duplicate that work.

WHY COUNCILS ENGAGE VICTERIX

- ✓ Additional delivery capacity without adding to permanent headcount
- ✓ Single accountable interface coordinating consultants, contractors and stakeholders
- ✓ Structured governance, reporting and document control on every engagement
- ✓ Engagement aligned with council's own procurement and contracting processes

CORE CAPABILITIES

CAPITAL WORKS & PROGRAMME DELIVERY

Project and programme management for capital works, facility and infrastructure delivery - business case, feasibility, procurement, programme and budget control, and delivery-readiness through to completion.

CONSULTANT & CONTRACTOR COORDINATION

Procurement, coordination and quality oversight of a project's specialist consultants and contractors, including prequalification, licence and insurance verification, scope-gap review, and deliverable coordination - with technical certification retained by the appropriately qualified author.

CLIENT-SIDE PROJECT MANAGEMENT & OWNER'S REPRESENTATIVE

Acting on council's behalf to manage delivery interfaces, variations, reporting and commercial administration, so internal teams retain oversight without carrying day-to-day coordination load.

GOVERNANCE, REPORTING & DELIVERY ASSURANCE

Defined project governance, risk and issue registers, change control, and consolidated programme and budget reporting - giving council one source of truth across every workstream.

STAKEHOLDER, AGENCY & REGULATORY COORDINATION

Structured engagement with community, agencies and regulators where a project requires it, conducted in line with applicable probity, lobbying and conflict-of-interest requirements.

DELIVERY MODEL

Victorix is Director-led, engaging project-specific specialist practitioners scaled to suit each assignment. Victorix coordinates delivery, integration, reporting and commercial administration; each engaged professional retains responsibility for their own specialist advice and certification.

CANONICAL DELIVERY METHODOLOGY

A repeatable six-step method gives councils a predictable engagement while allowing scope and resourcing to be tailored to each project.

1 DEFINE	Objectives, scope and success criteria
2 DIAGNOSE	Constraints, stakeholders and critical risks
3 PLAN	Delivery strategy, programme, budget and governance
4 MOBILISE	Appoint specialists and establish controls
5 DELIVER	Coordinate workstreams, decisions and reporting
6 ASSURE	Quality review, approvals closeout and handover
